

Provision of clean water, proper hygiene, and sanitation are essential lines of defense for COVID-19 and keeping our communities healthy by preventing spread of disease

RESPONSE:

- Installing additional WASH access points
- Behavior change through training
- Uniting WASH utilities across Kenya for sharing best practice and consolidating urgent needs

RECOVERY:

- Monitoring and sharing impacts of interventions
- Support utilities on prioritization, recovery and investment planning
- Develop bankable expansion projects and proposals

RESILIENCE:

- Partner with utilities, ministry of health and other local entities in resilience and crises prevention plans
- Community hygiene campaigns

BUILD BACK BETTER

Developing Water and Sanitation Utilities that are more prepared, stronger, and have greater reach than before COVID-19.
